

## **FEELING BOXED IN BY OUTSOURCED PAYROLL?**

## **FEELING BOXED IN BY IN-HOUSE PAYROLL?**

## **WONDERING WHY YOU CAN'T GET THE BEST OF BOTH WORLDS?**

Business Technology Solutions invites you to join us for a **complimentary one hour web seminar** to see how a mixture of outsourced and in-house systems can be the right answer to critical human resource questions such as:

- What can be done to reduce or **stop entering the same employee information into more than one system** especially if one is outsourced?
- Is it possible to **eliminate the use of Excel spreadsheets or other manual reporting tools** but still effectively reach decisions to run the business?
- Shouldn't you be able to process payroll in-house, but **let someone else handle the complexity of tax reporting**?
- How can we have access to **reports with both employee HR and Payroll information** but still outsource payroll?
- Can we **contain costs** while still delivering vital services to our employees?
- Is there a way to **retain tight control of sensitive human resource information** within our organization, but still take advantage of the opportunity to outsource the number crunching of payroll?
- Is it too much to ask that new or one time reports with HR and/or payroll information **not have to be a pay as you go** budgeting nightmare?
- How can we process **payroll in-house but offload the task of printing checks and/or stuffing envelopes**?
- Can we grow our business with **improved processes without adding more employees**?

Please see the attached for options on how to register for this and other complimentary web seminars focused on operating your business more effectively in an increasingly complex world.
